Students

Student Safety

In promoting the well-being of all students and employees of Southeast Technical Institute, the institute shall maintain a healthful and safe environment in all STI facilities. Practices and procedures necessary in implementing this policy should include periodic inspection of STI facilities; plans which are periodically reviewed for evacuating facilities or other ways dealing with emergency situations; a system for reporting and dealing with accidents; a plan of workers compensation insurance, student accident insurance; and, in-service education for promoting both wellness and accident prevention. A safety committee shall plan and oversee STI's safety program.
