

## Policies and Regulations

### Policy STC 510

---

#### Support Services

##### Building Maintenance

The facilities of Southeast Technical College represent a substantial investment by the community.

An effective educational program requires clean, safe, and well maintained facilities. It is the goal of STC to provide schools that are suitable settings for learning, secure, safe from hazards, sanitary, properly equipped, lighted, and ventilated.

STC acknowledges that normal deterioration from natural elements and ordinary use will occur and desires that a continuing program for the maintenance of all STC operated facilities be established.

The Sioux Falls School District Director of Operational Services and the Vice President of Finance and Operations are responsible for the care and protection of these facilities.

Operational Services assists in overseeing all facilities owned and leased by STC. Staff members will work to maintain the integrity of all buildings, minimize fire hazards, reduce the probability of faulty equipment, and protect against vandalism and burglary.

The Vice President of Finance and Operations will continuously monitor STC facilities and equipment, the parking lots, and grounds in order to insure the safety and comfort of the students and staff.
